- How has the site changed since 2005?

The site has changed from a small start up to one of the biggest companies in the world so it has changed in size and in use of the company as a whole.

Part 2

https://www.backcountry.com/?CMP_ID=DF_backcpuntrycom

https://www.amazon.com/

https://www.infinitecampus.com/

Amizone had the most amount of errors, and was the least validated probably for the fact that it's the biggest website with the most amount of people working on it.

Infinite campus was the most validated; it had the least amount of ears, for the fact it's the smallest.

Bad element has the most common in Backcountry and on Amazon, made for the fact that they both deal with selling stuff.
